

EVERWILLING PLATFORMS

WITH OVER 30 YEARS OF DESIGN EXPERIENCE, EVERWILLING PLATFORMS ARE THE SAFEST, MOST EFFICIENT PLATFORMS AVAILABLE TODAY.

Everwilling Landing Platforms enable no fuss, safe transition of materials into buildings under construction. They considerably reduce crane time thereby recouping their hire costs many times over during the building process.

EVERWILLING HAS BEEN DESIGNING, MANUFACTURING AND HIRING LANDING PLATFORMS SINCE 1982 MAKING US THE LONGEST EXISTING PLATFORM HIRE COMPANY IN NSW.

Originally being part of Everwilling Cranes, Everwilling Platforms well understands the requirements of materials handling in the construction industry. Drawing on this experience and, the continual feedback sought from end users has enabled us to manufacture platforms that are user friendly, safe and cost effective.

We have a huge range of fixed and retractable landing platforms for hire. Our retractable landing platforms come with a 'one person' ratchet operation system which enables the platform to be fully extended in a matter of seconds with no fuss.

All Everwilling Platforms are engineer certified and subjected to regular inspection as well as come complete with detailed safe work method statements and comprehensive hirer inductions.

Innovative Safety Locking System provides site personnel with full control of the opening of platform doors and the use of fall protection equipment. The positioning of the Safety Locking System on the inside of the platform door also eliminates the hazard of falling objects.

Snag-free interior.
Super wide platform deck.

One man operation.
No fuss extension in a matter of seconds.
